```

Check out Gregory Improve Memory

Code for button:

```
<a href="This is where your HopLink goes" class="button">Check out Gregory Improve Memory </a>
```

Creating a Human-Readable HopLink

You can create a readable **HopLink** using my nickname (gregorywvm) and your affiliate **nickname**.

NOTE – Readable HopLinks are not as secure as encrypted HopLinks.

We recommend generating an encrypted HopLink using a product listing or [HopLink Shield](#). (see above)

The HopLink uses one of the following formats:

<https://hop.clickbank.net/?affiliate=AFFILIATE&vendor=gregorywvm>

<http://hop.clickbank.net/?affiliate=AFFILIATE&vendor=gregorywvm>

<http://AFFILIATE.gregorywvm.hop.clickbank.net>

Replace **AFFILIATE** with your account nickname.
